Re: **Senior Full Stack Developer (Laravel/Symfony, Vue.js)**
novu — Zürich, Switzerland

Dear novu Hiring Team,

I am writing to express my interest in the Senior Full Stack Developer position at novu. Based in Elsau, just outside Zürich, I bring 25 years of hands-on PHP development with deep expertise in Laravel, Vue.js, and modern full-stack architectures — precisely the combination your team is looking for.

Over the past 13+ years at Sunrise Communications AG, I have owned and delivered complex, business-critical applications from architecture to production. My most relevant project is AMP (Application Management Portal) — a full-stack call centre productivity suite built entirely with Laravel, Vue.js, Oracle, MySQL, Redis, and Elasticsearch, running on FrankenPHP/Docker/GCP. Beyond Laravel, I have solid Symfony experience and have worked with headless CMS platforms including Craft CMS, Statamic, and WordPress across both agency-style and enterprise environments.

What attracts me to novu is the combination of technical depth and design-conscious craft. I take user experience seriously — not as an afterthought, but as a core engineering responsibility. My work spans both backend API design and clean, component-driven Vue.js interfaces, and I consider the two inseparable. I am equally comfortable owning an entire feature end-to-end as I am collaborating closely within a team.

I am based in eastern Canton Zürich and available for regular office attendance in Zürich. I speak fluent German at business level and am equally comfortable working in English.

I would welcome the opportunity to discuss how my background aligns with your needs. My full resume and skill matrix are available at giancarlopapa.com.

Kind regards,

Giancarlo Papa
Senior Full Stack Engineer
