GIANCARLO PAPA

Senior Full Stack Engineer – Cloud Platform & AI Engineering

Email: giancarlo.papa@gmail.com · **Phone:** +41 76 337 13 75
Location: 8352 Elsau, Zürich – CH · **Web:** giancarlopapa.com
Nationality: Italian (EU) · C permit
GitHub: github.com/gpx75 · **LinkedIn:** linkedin.com/in/gpapa
Languages: German C2 (bilingual, schooled in Germany) · English C1 · Italian Native

ABOUT

I am a creative, self-taught Full Stack Web artisan who started writing code at the age of eleven. Web development is not just my profession, but a lifelong discipline driven by curiosity, experimentation, and a deep passion. I build and run business-critical web apps end to end: Vue.js SPAs in TypeScript, Node.js, Python and PHP services, SQL data layers (PostgreSQL, MySQL, Oracle) and enterprise integrations (Salesforce, CRM, LDAP). I am especially passionate about Linux, Docker and the cloud. I take features from prototype to production with, in my head of department's words, "tremendous autonomy". Father of a beautiful child.

CORE COMPETENCIES

- **Node.js ecosystem & tooling** – Node.js (Nuxt/Nitro) server APIs in AI prototypes and on my own platform; npm, Vite, ESLint
- **TypeScript ecosystem & tooling** – TypeScript in Sunrise Vue.js apps and end to end on my Nuxt platform (vue-tsc)
- **Modern SPAs (Vue.js/Nuxt)** – AMP, FeedbackTool, Jordan AI; AI PoCs in Nuxt: my-ai (Node.js), AIBO and AITO (FastAPI)
- **AI & Cloud (cloud-agnostic)** – Azure OpenAI (chat, speech, OCR), Claude API; serverless on Cloud Run, AWS Lambda and Vercel; Compute Engine VMs
- **SQL & ORM (database-agnostic)** – PostgreSQL, MySQL, Oracle in production: queries, transactions, views, indexes; migrations, row-level security; Eloquent, Doctrine
- **Docker & CI/CD pipelines** – Docker on RHEL/GCP; GitLab CI, Jenkins, Bitbucket Pipelines, Cloud Build, GitHub Actions
- **Python** – FastAPI backends (Jordan AI, AIBO, AITO); data warehouse work at Sunrise
- **Integrations & customer issue resolution** – Salesforce, Clarify CRM, LDAP, OAuth/REST; 2nd/3rd-level support with Customer Care

WORK EXPERIENCE

Sunrise GmbH | Zürich, Switzerland

Tech Lead OMNI Channel Platforms · Feb 2024 – Present

- AI research & cloudification: Nuxt/Node.js and Python AI prototypes on Cloud Run.
- Built Laravel REST APIs on Clarify CRM (Oracle DB) and the Sunrise user directory (LDAP/Oracle), consumed by internal applications.
- Salesforce frontend development with Lightning Web Components (LWC).
- Tech leadership: architecture, engineering standards, tech-debt reduction.

SUCCESS STORIES

- **AMP platform:** Legacy PHP 5.3/jQuery app → rebuilt in Laravel/Vue.js, now Laravel 12 + Vue 3/TypeScript → ~500 users a day; evolved by me for 11 years (2014–2025).
- **Jordan AI – Liberty Global:** No help for agents during live calls → built Sunrise's real-time AI agent-assist, integrated into Clarify CRM → prototype for Sprinklr.
- **Salesforce DevOps:** Releases run by an external vendor in India → took DevOps in-house with Bitbucket and CI/CD → full ownership of multi-environment releases.
- **Cloud migration:** On-prem apps, manual deploys → moved the Clarify API and AI PoCs to Cloud Run (GCP) with Cloud Build CI/CD → reproducible, reliable releases.

KEY PROJECTS

giancarlopapa.com – personal website & recruiting platform, since 2025 (github.com/gpx75)

My personal website and the recruiting platform I built to run my own job search — this CV included. Admin: job discovery from five sources (jobs.ch, SwissDevJobs, ictjobs, JSearch, BambooHR) with relevance scoring and de-duplication; AI fit analysis with the Claude API; a multi-stage pipeline (analyse → CV → cover letter → apply → interview prep); tailored CVs in four languages with automatic two-page PDF fitting; Gmail inbox sync, outbox, contacts and funnel analytics. TypeScript end to end: Vue.js/Nuxt, Node.js (Nitro) APIs, PostgreSQL (Supabase) with row-level security, OAuth; CI/CD with GitHub Actions.

PREVIOUS WORK EXPERIENCE

Sunrise GmbH | Zürich, Switzerland

Developer Big Data · Mar 2019 – Jan 2024

- Designed, developed and maintained the AMP platform and FeedbackTool: PHP (Laravel) and Python backends, Vue.js frontends, enterprise API integrations.
- Data warehouse development with SQL and Python (Oracle).
- Deployment and operation on Linux (RHEL) with Docker, Git and CI/CD pipelines.

Developer ERP, BI & Billing · Apr 2018 – Feb 2019

- Took the Laravel/Vue.js version of AMP FeedbackTool (v2) to production with LDAP auth — a trusted tool for Customer Care and Quality Management.

Specialist Application · Apr 2012 – Mar 2018

- 2nd/3rd-level support for the business-critical AMP platform (PHP 5.3/jQuery): analysed and resolved complex production issues with business units and technical teams; started its Laravel/Vue.js rebuild.
- Started the AMP FeedbackTool on my own initiative for Customer Care — adopted by IT as an official internal platform and later rebuilt as enterprise-grade v2.

Sicilia On Line Srl | Palermo, Italy

Webmaster & Full Stack Developer · May 2006 – Dec 2011

- Built and scaled PHP/MySQL platforms with custom Joomla extensions for siciliaonline.it, gds.it and blogsicilia; ran and hardened the LAMP stack.

EDUCATION

Diploma di Ragioniere e Perito Commerciale (upper-secondary technical diploma)

ITC "G. Salerno" — Gangi (PA), Italy · 1992 – 1997

Diploma di Operatore-Programmatore (programmer diploma)

Scuola 2F — Florence, Italy · 1989

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt, TypeScript / JavaScript, React, HTML5 / CSS

Backend: Node.js (Nuxt / Nitro), PHP / Laravel / Symfony, Python / FastAPI, REST APIs, GraphQL, ORMs (Eloquent / Doctrine)

Databases: PostgreSQL, MySQL / MariaDB, Oracle DB, Redis, Elasticsearch

DevOps & CI/CD: Docker, GitLab CI / Jenkins, GitHub Actions, Git, Release automation, Kubernetes (fundamentals), Terraform (GCP)

Cloud & Linux: Google Cloud (Cloud Run, Cloud Build, Compute Engine), AWS (S3, SQS, SNS, Lambda), Vercel, Linux (RHEL / Debian / Ubuntu / Fedora), Nginx / Apache

Security & Identity: OAuth, LDAP / Active Directory, SSL / TLS

AI & Automation: LLM integration (Claude, Azure OpenAI, Vertex AI), Workflow automation
