Senior Full Stack Engineer – Cloud Platform & AI Engineering

GIANCARLO PAPA

Diploma di Ragioniere e Perito Commerciale (upper-secondary technical diploma)

Email: giancarlo.papa@gmail.com · **Phone:** +41 76 337 13 75

Location: 8352 Elsau, Zurich – CH · **Web:** giancarlopapa.com

GitHub: github.com/gpx75 · **LinkedIn:** linkedin.com/in/gpapa

Language: Italian Mothertongue · German Bilingual C2 · English C1

Interests: Raspberry Pi · Trail running · Hiking · Furniture restoration · Travelling · Gardening · Handicrafts

SUMMARY

I am a creative, self-taught Full Stack Web artisan who started writing code at the age of eleven. Web development is not just my profession, but a lifelong discipline driven by curiosity, experimentation, and a deep passion. I build and run business-critical web apps end to end: Vue.js SPAs in TypeScript, Node.js, Python and PHP services, SQL data layers (PostgreSQL, MySQL, Oracle) and enterprise integrations (Salesforce, CRM, LDAP). I am especially passionate about Linux, Docker and the cloud. I take features from prototype to production with, in my head of department's words, "tremendous autonomy". Father of a beautiful child.

SUCCESS STORIES

- **AMP platform:** Legacy PHP 5.3/jQuery app → rebuilt in Laravel/Vue.js, now Laravel 12 + Vue 3/TypeScript → ~500 users a day; evolved by me for 11 years (2014–2025).
- **Jordan AI – Liberty Global:** No help for agents during live calls → built Sunrise's real-time AI agent-assist, integrated into Clarify CRM → prototype for Sprinklr.
- **Salesforce DevOps:** Releases run by an external vendor in India → took DevOps in-house with Bitbucket and CI/CD → full ownership of multi-environment releases.
- **Cloud migration:** On-prem apps, manual deploys → moved the Clarify API and AI PoCs to Cloud Run (GCP) with Cloud Build CI/CD → reproducible, reliable releases.
- **High-Traffic Portal:** Built and scaled PHP/MySQL platforms serving 10,000+ daily visitors across siciliaonline.it, gds.it, and blogsicilia.
- **Platform Modernisation:** Evolved ad-hoc PHP scripts into structured Joomla architecture – improving performance, SEO, and editorial workflows.

CORE COMPETENCIES

- **Full-Stack Development** – Vue.js/TypeScript SPAs on Laravel, Node.js (Nuxt/Nitro) and Python (FastAPI) backends; AMP evolved over 11 years (2014–2025)
- **AI & Cloud (cloud-agnostic)** – AI prototypes with Azure OpenAI and the Claude API; serverless on Cloud Run and AWS Lambda, Compute Engine VMs
- **DevOps & CI/CD** – Docker on RHEL/GCP; GitLab CI, Jenkins, Bitbucket Pipelines, Cloud Build, GitHub Actions; Salesforce DevOps brought in-house
- **SQL & Data (database-agnostic)** – PostgreSQL, MySQL, Oracle in production: queries, transactions, views, indexes; data warehouse development
- **Technical Leadership** – Tech Lead OMNI Channel Platforms since 2024 – architecture, engineering standards, tech-debt reduction; "tremendous autonomy" (Head of OMNI Channel)

WORK EXPERIENCE

Tech Lead OMNI Channel Platforms

Sunrise GmbH · Zürich, Switzerland · Feb 2024 – Present

- AI research & cloudification: Nuxt/Node.js and Python AI prototypes on Cloud Run.
- Built Laravel REST APIs on Clarify CRM (Oracle DB) and the Sunrise user directory (LDAP/Oracle), consumed by internal applications.
- Salesforce frontend development with Lightning Web Components (LWC).
- Tech leadership: architecture, engineering standards, tech-debt reduction.

PREVIOUS WORK EXPERIENCE

Developer Big Data

Sunrise GmbH · Zürich, Switzerland · Mar 2019 – Jan 2024

- Designed, developed and maintained the AMP platform and FeedbackTool: PHP (Laravel) and Python backends, Vue.js frontends, enterprise API integrations.
- Data warehouse development with SQL and Python (Oracle).
- Deployment and operation on Linux (RHEL) with Docker, Git and CI/CD pipelines.

Developer ERP, BI & Billing

Sunrise GmbH · Zürich, Switzerland · Apr 2018 – Feb 2019

- Took the Laravel/Vue.js version of AMP FeedbackTool (v2) to production with LDAP auth — a trusted tool for Customer Care and Quality Management.

Specialist Application

Sunrise GmbH · Zürich, Switzerland · Apr 2012 – Mar 2018

- 2nd/3rd-level support for the business-critical AMP platform (PHP 5.3/jQuery): analysed and resolved complex production issues with business units and technical teams; started its Laravel/Vue.js rebuild.
- Started the AMP FeedbackTool on my own initiative for Customer Care — adopted by IT as an official internal platform and later rebuilt as enterprise-grade v2.

Webmaster & Full Stack Developer

Sicilia On Line Srl · Palermo, Italy · May 2006 – Dec 2011

Webmaster and lead developer for siciliaonline.it — a high-traffic regional portal serving 10,000+ daily visitors — and associated properties gds.it and blogsicilia. Full ownership of PHP application development, Joomla CMS architecture, and LAMP server operations across the entire network.

- Built and scaled PHP/MySQL platforms serving 10,000+ daily visitors across siciliaonline.it, gds.it, and blogsicilia.
- Developed custom Joomla/Mambo components, plugins, and templates for newsroom and editorial workflows.
- Led platform redesigns improving performance, SEO, and reader engagement.

KEY PROJECTS

giancarlopapa.com – personal website & recruiting platform

My personal website and the recruiting platform I built to run my own job search. Admin: job discovery from five sources with relevance scoring and de-duplication; AI fit analysis with the Claude API; a multi-stage pipeline (analyse → CV → cover letter → apply → interview prep); tailored CVs in four languages with automatic two-page PDF fitting; Gmail inbox sync, contacts and funnel analytics. TypeScript end to end on Vue.js/Nuxt, Node.js (Nitro) APIs and PostgreSQL (Supabase); CI/CD with GitHub Actions.

TECHNICAL SKILLS

PHP & Web: PHP, Python, FastAPI, Node.js (Nuxt / Nitro), Laravel, Eloquent ORM, Symfony, Doctrine ORM, Vue.js, Nuxt, JavaScript / TypeScript, HTML5 / CSS, Twig, Composer, RESTful APIs, GraphQL

AI & Development: AI-Assisted Development, AI Agent Development, LLM Integration, Azure OpenAI / GPT, Claude API, Vertex AI, Gemini API, Prompt Engineering, Big Data Platforms, Analytics Engineering

Cloud & Platform: Linux (RHEL / Debian / Ubuntu / Fedora), Docker, Google Cloud (Cloud Run, Cloud Build, Compute Engine), AWS (S3, SQS, SNS, Lambda), Serverless Deployments, Object Storage (S3 / GCS), GitLab CI / Jenkins, Bitbucket Pipelines, GitHub Actions, Kubernetes (fundamentals), Terraform (basics)

Payments & Fintech: Payment Platform Development, Stripe, PayPal, Payment Gateway Integration, PCI-DSS Awareness

Databases & Enterprise: MySQL, Oracle DB, PostgreSQL, MariaDB, Redis, Elasticsearch, MongoDB, Salesforce / Apex / LWC, LDAP / Active Directory

E-Commerce & CMS: WordPress, Joomla / Mambo, Craft CMS, Shopware 5 & 6, Statamic, Headless CMS

Methodology: Agile / Scrum, Code Reviews, CI / CD, Unit & Integration Testing, Static Code Analysis, Pair Programming, Version Control (Git)

DevOps & Networking: Bash / Shell scripting, Nginx / Apache, TCP/IP / DNS, SSL / TLS, System hardening
