Senior Full Stack Engineer – Cloud Platform & AI Engineering

GIANCARLO PAPA

Diploma — Istituto Tecnico Economico — Sistemi Informativi Aziendali

Email: giancarlo.papa@gmail.com · **Phone:** +41 76 337 13 75

Location: 8352 Elsau, Zurich — CH · **Web:** giancarlopapa.com

GitHub: github.com/gpx75 · **LinkedIn:** linkedin.com/in/gpapa

Language: Italian Mothertongue · German Bilingual C2 · English C1

Interests: Trail running · Hiking · Furniture restoration · Travelling · Gardening · Handicrafts

SUMMARY

I am a self-taught web artisan, coding since eleven (BASIC on a C64). I design and build robust, scalable web platforms with clean architecture, driven by curiosity and a strong commitment to open source. I have delivered high-traffic public platforms in Italy and business-critical enterprise software in the Swiss telecom sector. As Tech Lead for the OMNI Channel Platforms unit at Sunrise, I take end-to-end technical ownership: architecture and technology decisions, REST/API design and system integration, engineering standards, and reliable DevOps operations. I lead hands-on, enforce best practices, and build systems that last.

SUCCESS STORIES

- **AMP Platform — Call Centre Backbone:** Replaced fragile legacy script with a full-stack call-centre platform (Laravel/Vue.js) — mission-critical for 7+ years across all Sunrise Customer Care.
- **Jordan AI — Liberty Global:** Built AI-powered real-time call assistant (Python/FastAPI + Azure OpenAI) — deployed internationally across Liberty Global subsidiaries.
- **DevOps Transformation:** Migrated from manual LAMP deployments to Docker/GCP/GitLab CI — release reliability improved, deployment frequency increased substantially.
- **High-Traffic Portal:** Built and scaled PHP/MySQL platforms serving 10,000+ daily visitors across siciliaonline.it, gds.it, and blogsicilia.
- **Platform Modernisation:** Evolved ad-hoc PHP scripts into structured Joomla architecture — improving performance, SEO, and editorial workflows.

CORE COMPETENCIES

- **Full-Stack Development (PHP / Laravel / Vue.js)** — 25 years PHP — built AMP platform (Laravel/Vue.js) running 7+ years in production at Sunrise
- **Cloud & DevOps (GCP / Docker / CI-CD)** — Led LAMP → Docker/GCP migration — GitLab CI pipelines, containerised deployments on RHEL
- **AI & LLM Integration** — Built Jordan AI (Liberty Global) — Python/FastAPI + Azure OpenAI for real-time call assistance at scale
- **Technical Leadership** — 13+ years Tech Lead OMNI Channel Platform — architecture decisions, roadmaps, engineering standards
- **Salesforce DevOps** — CI/CD pipelines, Apex/LWC development, API integrations, enterprise data sync at Sunrise

WORK EXPERIENCE

Tech Lead OMNI Channel Platforms & Senior Full Stack Engineer

Sunrise Communications AG · Zurich, Switzerland · Jan 2012 – Present

- Technical Lead for the OMNI Channel Platform: driving architectural decisions, establishing engineering standards, defining technical roadmaps, and serving as the primary technical reference for business stakeholders and engineering teams.
- Designed and built scalable full-stack applications using PHP (Laravel), Vue.js, TypeScript, and REST APIs — deployed on GCP and Linux (RHEL) with Docker and CI/CD pipelines.
- Architected and owned AMP — a multilingual call-centre productivity suite (Laravel/Vue.js/Oracle/MySQL/Redis/Elasticsearch) — from design to production.
- Salesforce DevOps Engineer: CI/CD pipelines, release management, custom Apex, LWC components, Flows, API integrations, and enterprise data sync.
- Drove DevOps transformation: LAMP/LEMP to FrankenPHP on Docker/GCP/RHEL, GitLab CI/Jenkins pipelines, release automation.
- Developed AMP (Laravel/Vue.js/Oracle/MySQL/Redis/Elasticsearch): call centre portal — ticket templates (4 langs), distribution, and feedback tools.

PREVIOUS WORK EXPERIENCE

Webmaster & Full Stack Developer

Sicilia On Line Srl · Palermo, Italy · May 2006 – Dec 2011

Webmaster and lead developer for siciliaonline.it — a high-traffic regional portal serving 10,000+ daily visitors — and associated properties gds.it and blogsicilia. Full ownership of PHP application development, Joomla CMS architecture, and LAMP server operations across the entire network.

- Built and scaled PHP/MySQL platforms serving 10,000+ daily visitors across siciliaonline.it, gds.it, and blogsicilia.
- Developed custom Joomla/Mambo components, plugins, and templates for newsroom and editorial workflows.
- Led platform redesigns improving performance, SEO, and reader engagement.

TECHNICAL SKILLS

PHP & Web: PHP (25 yrs), Python, FastAPI, Laravel, Eloquent ORM, Symfony, Doctrine ORM, Vue.js, Nuxt, JavaScript / TypeScript, HTML5 / CSS, Twig, Composer, RESTful APIs, GraphQL

AI & Development: AI-Assisted Development, AI Agent Development, LLM Integration, Azure OpenAI / GPT, Vertex AI, Gemini API, Prompt Engineering, Big Data Platforms, Analytics Engineering

Cloud & Platform: Linux (RHEL / Debian / Ubuntu), Docker, Cloud Infrastructure (GCP & AWS), Serverless Deployments, Google Cloud Platform, Cloud Run, AWS Lambda, AWS (S3, SQS, SNS), Object Storage (S3 / GCS), GitLab CI / Jenkins, Kubernetes, Terraform

Payments & Fintech: Payment Platform Development, Stripe, PayPal, Payment Gateway Integration, PCI-DSS Awareness

Databases & Enterprise: MySQL, Oracle DB, PostgreSQL, MariaDB, Redis, Elasticsearch, MongoDB, Salesforce / Apex / LWC, LDAP / Active Directory

E-Commerce & CMS: WordPress, Joomla / Mambo, Craft CMS, Shopware 5 & 6, Statamic, Headless CMS

Methodology: Agile / Scrum, Code Reviews, CI / CD, Unit & Integration Testing, Static Code Analysis, Pair Programming, Version Control (Git)

DevOps & Networking: Bash / Shell scripting, Nginx / Apache, TCP/IP / DNS, SSL / TLS, System hardening
